About

Zaling Corporation is a technology company that builds and incubates proprietary platforms and services, including Greetwise and Moneytabs. Every product begins with a real need in everyday life. Founded in 2007, Zaling is guided by a simple idea: Reimagine the future.

Greetwise

greetwise.com

A business phone and AI automation platform. Organizations can provision dedicated business lines, then add optional AI, from call automation to fully customizable assistants on each line.

Moneytabs

moneytabs.app

Shared budgeting for households, roommates, and trips. Set a total for the month or a trip, reserve known bills, log spending as it happens, and see what is left today or this week.

Ventures

Zaling builds and incubates its own ventures, and invests internally in high-quality, passive-income assets chosen for durability and long-term fit. From time to time, it also makes selective investments that fit its strategy. All capital is Zaling's own. Zaling does not solicit or manage outside capital.
